

Introduction to

enjoy|nature.net

<http://www.enjoynature.net/birdwing>

- Is a free online database for species-based nature observations
 - Is a communication platform for those interested in nature
 - Works in co-operation with many nature conservation organisations and NGOs
- (so far generally in German-speaking countries only)

Enjoynature was launched in February 2008 and to date includes:

- more than 10 000 registered users
- around 4 million observations worldwide
- around 280 000 pictures
- over 82 000 locations worldwide

The idea behind enjoynature.net follows the principle of public science. Gathering observations of animals and plants anywhere in the world will help us to understand our own environment and its complex ecosystems. Through enjoynature EVERYBODY can contribute to nature conservation by collecting field-observations and sharing them with others.

Every observation that is available for everybody who is interested can help to protect nature.

Every observation which is not listed or available for everybody will leave a gap in the data.

 Airone rosso	 Puperreiger
 Purpurhäger	

comments
Ardea purpurea (Sibley and Monroe 1990, 1993) was split into *A. purpurea* and *A. bournei* by Hazevoet (1995). This treatment is not followed by the BirdLife Taxonomic Working Group although we do recognise consistent behavioural differences and that *bournei*

Purple Heron *Ardea purpurea* LINNAEUS, 1766

The **Purple Heron** (*Ardea purpurea*) is a wading bird in the heron family Ardeidae, breeding in Africa, central and southern Europe, and southern and eastern Asia. The European populations are migratory, wintering in tropical Africa; the more northerly Asian populations also migrate further south within Asia. It is a rare but regular wanderer north of its breeding range.

Description[edit]

The Purple Heron is a large bird, 78–97 cm (31–38 in) in length with a standing height from 70 to 94 cm (28 to 37 in) and a 120–152 cm (47–60 in) wingspan.^{[2][3]} However, it is slender for its size, weighing only 0.5–1.35 kg (1.1–3.0 lb).^[4] It is somewhat smaller than the Grey Heron, from which it can be distinguished by its darker reddish-brown plumage, and, in adults, darker grey back. It has a narrower yellow bill, which is brighter in breeding adults. The most similarly-colored heron is the Goliath Heron, which is considerably larger.

Taxonomy[edit]

There are three or four subspecies:

- *Ardea purpurea purpurea* Linnaeus, 1766. Africa, Europe north to the Netherlands, and southwestern Asia east to Kazakhstan.
- *Ardea purpurea bournei* (de Naurois, 1966), Bourne's Heron. Cape Verde Islands (included in *purpurea* by some authors, but treated as a distinct species *Ardea bournei* by some others).
- *Ardea purpurea madagascariensis* Oort, 1910. Madagascar.
- *Ardea purpurea manilensis* Meyen, 1834. Asia from Pakistan east to the Philippines and Indonesia, and north to Primorsky Krai, Russia.

Purple Heron *Ardea purpurea* LINNAEUS, 1766 >filter data

The map displays the Balkan region, specifically Greece and Albania. Purple Heron observation locations are marked with purple squares. These locations are concentrated in the northern part of Greece, particularly around Thessaloniki, and in the eastern part of the country. There are also a few observations in the southern part of Greece. The map includes major cities like Tirana, Thessaloniki, and Athens, as well as the Aegean Sea. A scale bar indicates 100 km and 50 miles. The map data is attributed to 2013 Basarsoft, Google, Mapa GISrael, and ORION-ME.

The map shows you where this species was observed in colour-coded fashion

Nutzungsbedingungen von naturgucker.de

1. Vorbemerkungen

Die folgenden Vorbemerkungen dienen dazu, Ihnen einen kurzen Überblick über die nachfolgenden eigentlichen Nutzungsbedingungen zu verschaffen, die dadurch aber nicht ersetzt werden.

* Die Nutzung aller Systemfunktionen von naturgucker.de ist für Sie kostenfrei.

* Die Rechte Ihrer veröffentlichten Daten (Beobachtungen, Bilder) gehören Ihnen, Sie erlauben naturgucker.de aber sie dauerhaft anzeigen.

naturgucker.de unterstützt und fördert den Naturschutz. Hierzu bieten wir Naturschutzvereinen und anderen gemeinnützigen Organisationen an, naturgucker für ihre Aufgaben einzusetzen. Im Rahmen dieser Zusammenarbeit erhalten diese Vereine und Einrichtung Zugriff auf alle Beobachtungen (unabhängig vom Beobachter), die in ihrem betreffenden Arbeitsgebiet gemacht werden, um sie im Rahmen ihrer Naturschutzarbeit zu nutzen.

☐ I accept the terms of use*

Creating new locations

← | home | observations | **locations** | pictures | enjoynature | me | regional |

search: countries / towns >go search: locations **>new location** >log out

for locations pls. click on towers!

The map displays the Balkan region, including Albania, North Macedonia, Bulgaria, and Greece. Numerous bird locations are marked with black tower icons. Major cities like Tirana, Skopje, Thessaloniki, and Athens are labeled. The map includes a scale bar (0-100 km / 0-50 mi) and a 'Map' dropdown menu in the top right corner. A red circle highlights the '>new location' button in the navigation bar.

*schlagwort

- ☐ help with identification desired
- ☐ safeguarded picture (name of location will be concealed)
- ☐ digiscoped picture

after saving, enjoynature needs usually up to 5 minutes (sometimes even longer!) until the new picture appears under pictures

picture file for upload on the server:

only JPEG pictures(.jpg) can be uploaded.
The file size may not exceed 10 MB. enjoynature.net recommends that your pictures have a minimum size of 400 kB with a resolution of 150 dpi.

You may only upload pictures for which you own the copyright.

This product uses the Flickr API but is not endorsed or certified by Flickr.

Link your picture to the corresponding species and It will appear in the species gallery. Putting the 'name' alone is not sufficient!

(*) mandatory fields

Very useful, if you don't know the species you've photographed. Check it and thus request help

Very important option, If you take a picture of a rare and endangered species.
